

WDI GROUP PROJECT

November 12 2017

Contents

1. Home Landing Page
2. Map Page / Review Page
3. Authentication

A pop up that would show the name of the destination along with a picture and other information that could help the driver.

We can use different markers to display the different Events, the one below would be for music and so on.

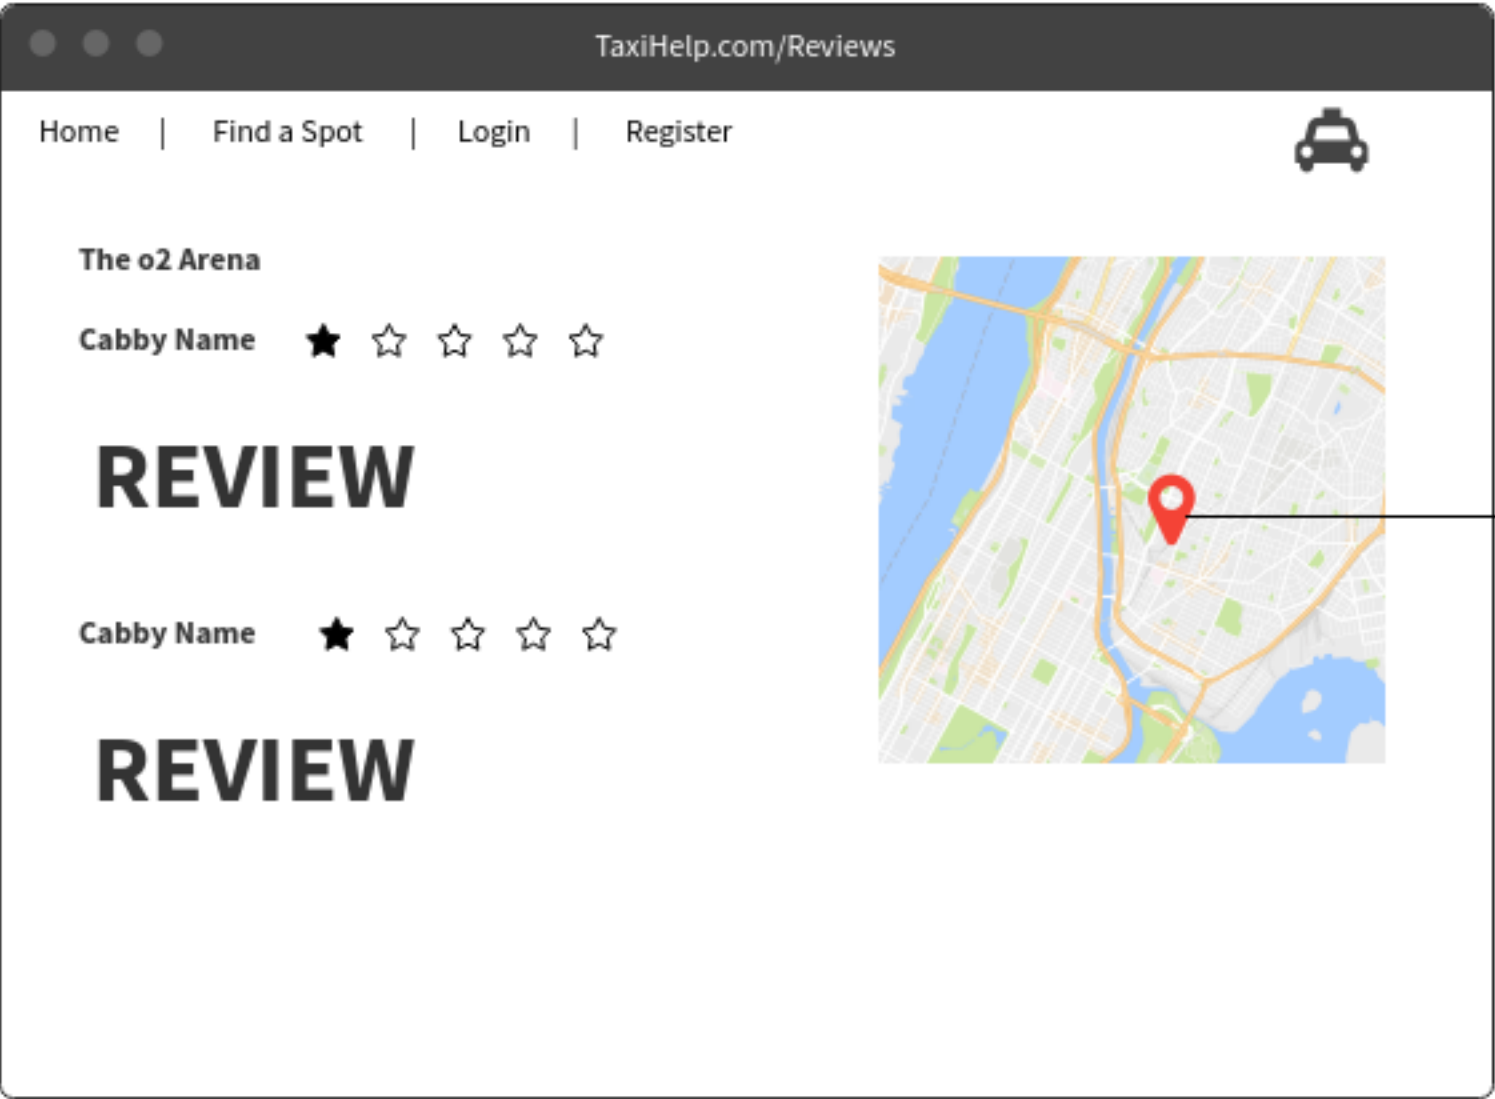

When the user ticks one of the events boxes the marker for that event will show on the map.

Miles (drop down)

5
10
15
20

The map will display all the events in the chosen area.

The marker will show the destination that the driver is reviewing.
